SUMMARY

Python-focused data science postgraduate with strong foundations in data analysis, machine learning, and generative AI concepts. Currently pursuing an MSc in Data Science at BITS Pilani while building hands-on experience in Python, data processing, and AI-driven systems. Comfortable working with real-world datasets to extract insights and deliver efficient, maintainable solutions using modern data science tools.

EDUCATION

Master of Science in Data Science | 2025–Present

BITS Pilani Digital

Bachelor of Science in Data Science | 2022–2025 | CGPA: 8.30/10

Maulana Abul Kalam Azad University of Technology, West Bengal

Affiliated with Calcutta Institute of Engineering and Management

Higher Secondary Education | WBCHSE Board

Subjects: Mathematics, Computer Science, Physics, Chemistry, English, Bengali

TECHNICAL SKILLS

Programming & Data: Python, Data Structures, Data Processing, Exploratory Data Analysis (EDA)

Data Science & AI: Pandas, NumPy, Machine Learning Fundamentals, Data Visualization, Generative AI Concepts

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Streamlit, Vercel

Web & Applications: APIs, Basic Backend Logic, Web Data Handling

ACADEMIC FOCUS AREAS

- Data Analysis and Visualization
- Statistical Thinking for Data Science
- Machine Learning Foundations
- AI and Generative AI Systems
